

The Wyland Foundation would like to guide our volunteers with how their time actively contributes to clean water and healthy oceans. It is crucial that our volunteers feel their time matters with every volunteer opportunity by using their personal talents. While each event is different, the main purpose is always to educate event attendees about the foundation goals and our efforts to support a future of clean water and healthy oceans. Each volunteer has an essential role to make our waterways cleaner.

How each event makes a difference, an overview of the event process, and volunteer involvement:

Wyland Foundation Mission: The Wyland Foundation brings people together for clean water and a healthy ocean.

Types of Events

Mobile Learning Center (MLC)

Creating a legacy of understanding for the next generation, this mobile learning experience enables people of all ages to gain an understanding of how their actions affect the health of our ocean & waterways. Each year thousands of people flow through this traveling exhibit and gain a new understanding of their impact on our water systems.

Paint n Pledge

This group expression of creativity for conservation brings an energetic presence at events. By working together on a community mural project, you can help build education opportunities and connections within the community.

Info Booth

Your passion, knowledge, and concern for our oceans and waterways gives visitors the tools and understanding on how to use small practical changes to bring effective environmental transformation. We also encourage special topic lectures such as Conservation Communication, Exploring Sustainable Practices, holding a variety of trending ecological discussions, and much more.
